## ABOUT ME

---

Hi, I'm Nika, thank you for the opportunity to apply for the role at your company. After reviewing your job description, it's clear that you're looking for a candidate that is extremely familiar with the responsibilities associated with the role, and can perform them confidently. I'm results-oriented front-end developer. I entered this big tech world in just a few months Forward and forward I found myself very flexible and adaptable to learning new things. What I like the most Programming is about making something out of nothing. I think I had the ability to work on any task, I have a great desire to work in a team Completing difficult tasks, constantly learning and developing. I also like when people think that creating any website or application is magic at first glance, and it all becomes normal for you and you do it easily, it feels very cool.
